BAFFLE BOARDS

Many Sewage Treatment Works call for a Baffle within the chamber, either to slow down flow or restrict flow. They also act as barriers to prevent debris impacting upon sensitive equipment.

They can also reduce the need for regular maintenance. They can be utilised as a form of Scumboard or Weiring devise control.

Material is generally RPC (Recycled Polycarbonate). Other materials available are Galvanised Mild Steel, Painted Mild Steel, Grade 304 Stainless Steel and Grade 316 Stainless Steel.

BAFFLE BOARDS

Baffle Plates

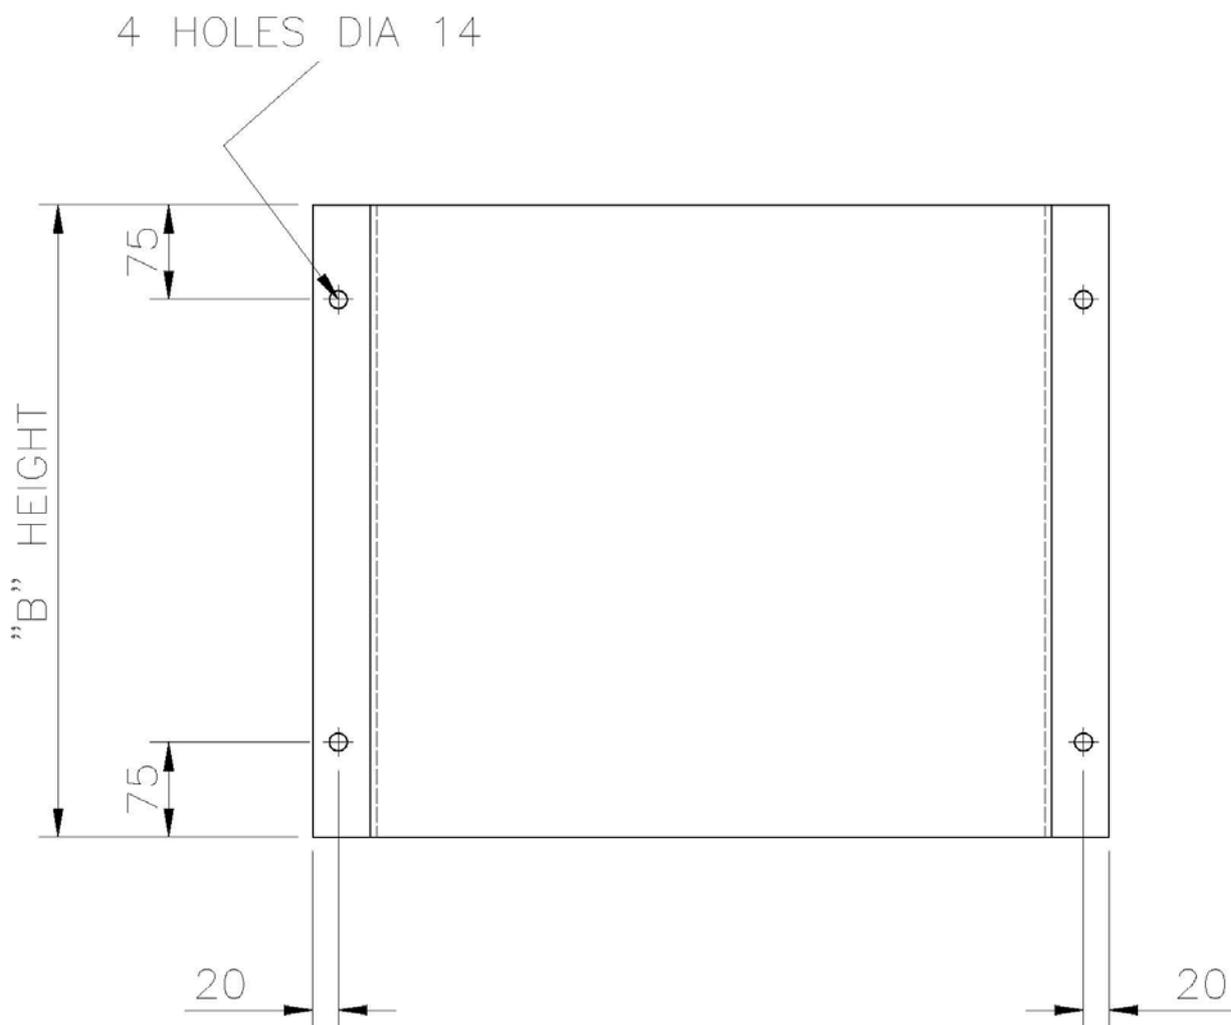

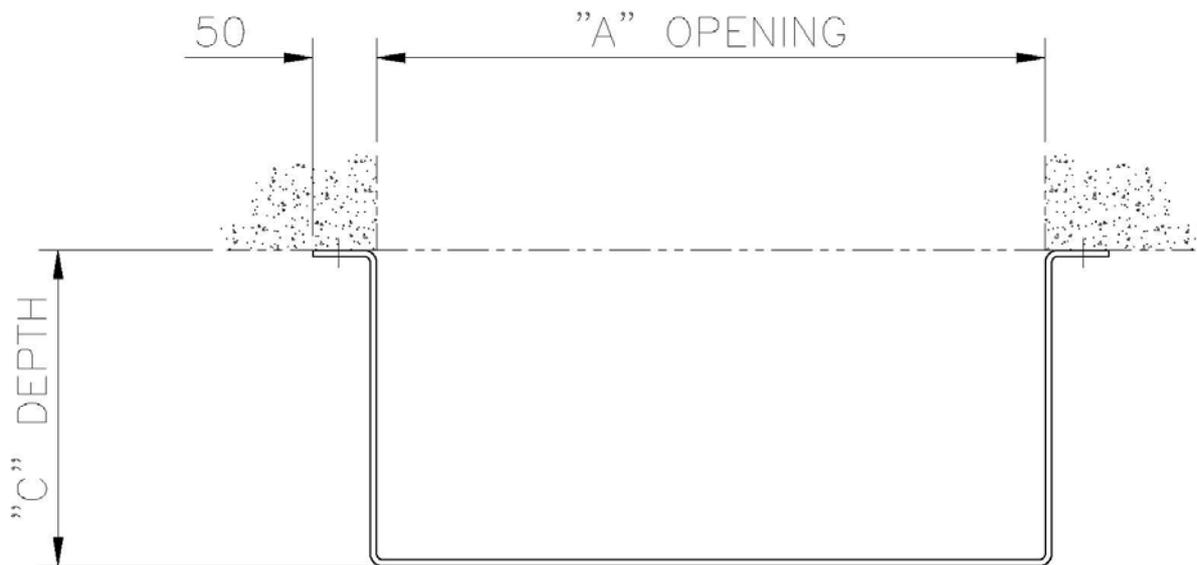

Construction Materials		
Item	Description	Materials
1	Baffle	RPC, MS, 304ss, 316ss
